

# aquadrip®

# MULTI-DRIP IRRIGATION

Everything you need for a **effective irrigation** in one set

**Saves up to 70% water**

**Effective irrigation**

**Above and below ground**

**Easy to set up**

**Saves time**

**ALL IN ONE SYSTEM**

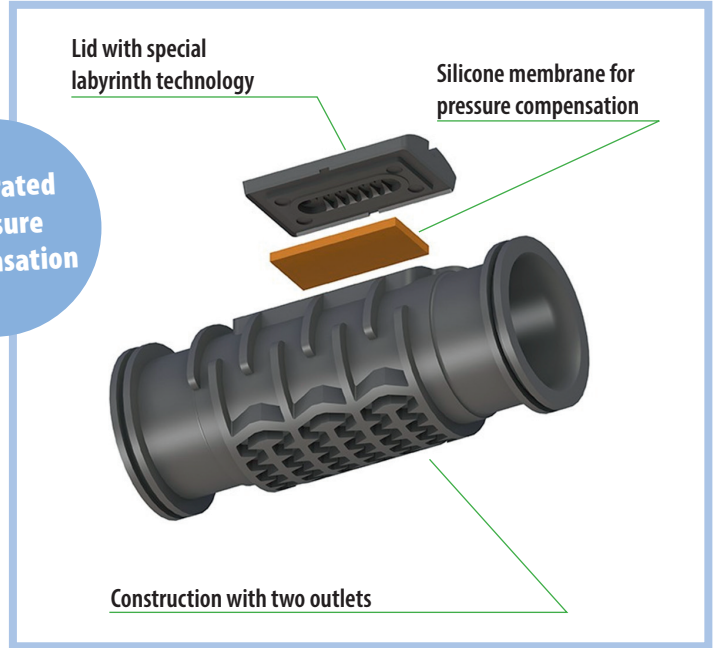

# aquadrip® Multi-Drip Irrigation

## Your start into perfect irrigation

When it comes to watering plants, drip irrigation is the most effective method that also saves plenty of water. Our **aquadrip®** starter set contains everything you need to get started. Easy to install and expandable, it allows you to customize your drip irrigation system to suit your needs.

Compared to conventional systems, aquadrip can do more: due to a **pressure compensation mechanism**, the water outlet rate on varying water pressure remains the same, thus ensuring an even irrigation of the plant rows. In addition, the technology offers protection against dirt, therefore **aquadrip®** can be laid both above and below the ground. Furthermore, the starter set includes the drip hose with an **extra length of 60 m!**

Integrated pressure compensation

## Why aquadrip®?

- ✓ All-in-one set to start an effective irrigation
- ✓ Below- and above ground installation
- ✓ Self-cleaning mechanism
- ✓ Drip hose with extra length (60 m)
- ✓ Integrated pressure compensation
- ✓ High UV-resistance
- ✓ Resistant to chemicals and fertilizers
- ✓ Including pressure reducer for a controlled operating pressure of 1 bar

## Technical Data

|  |                               |
|--|-------------------------------|
| Hose length                            | 60 m                          |
| Hose diameter                          | 16 mm                         |
| Wall thickness                         | 0,90 mm                       |
| Distance of the dripper                | 33 cm                         |
| Flow rate                              | 2 l/h                         |
| Pressure range (with pressure reducer) | 0,8 – 4,0 bar (up to 5,2 bar) |

60 m  
Extra Length

## Content starter set

Drip hose with pressure compensation 60 m

Pressure regulator with filter sieve including a hose adapter and a connector

Holding stake 20 pieces

Elbow – 16 mm hose barb 5 pieces

Connector – 16 mm hose barb 5 pieces

Tee 3 x 16 mm hose barb 5 pieces

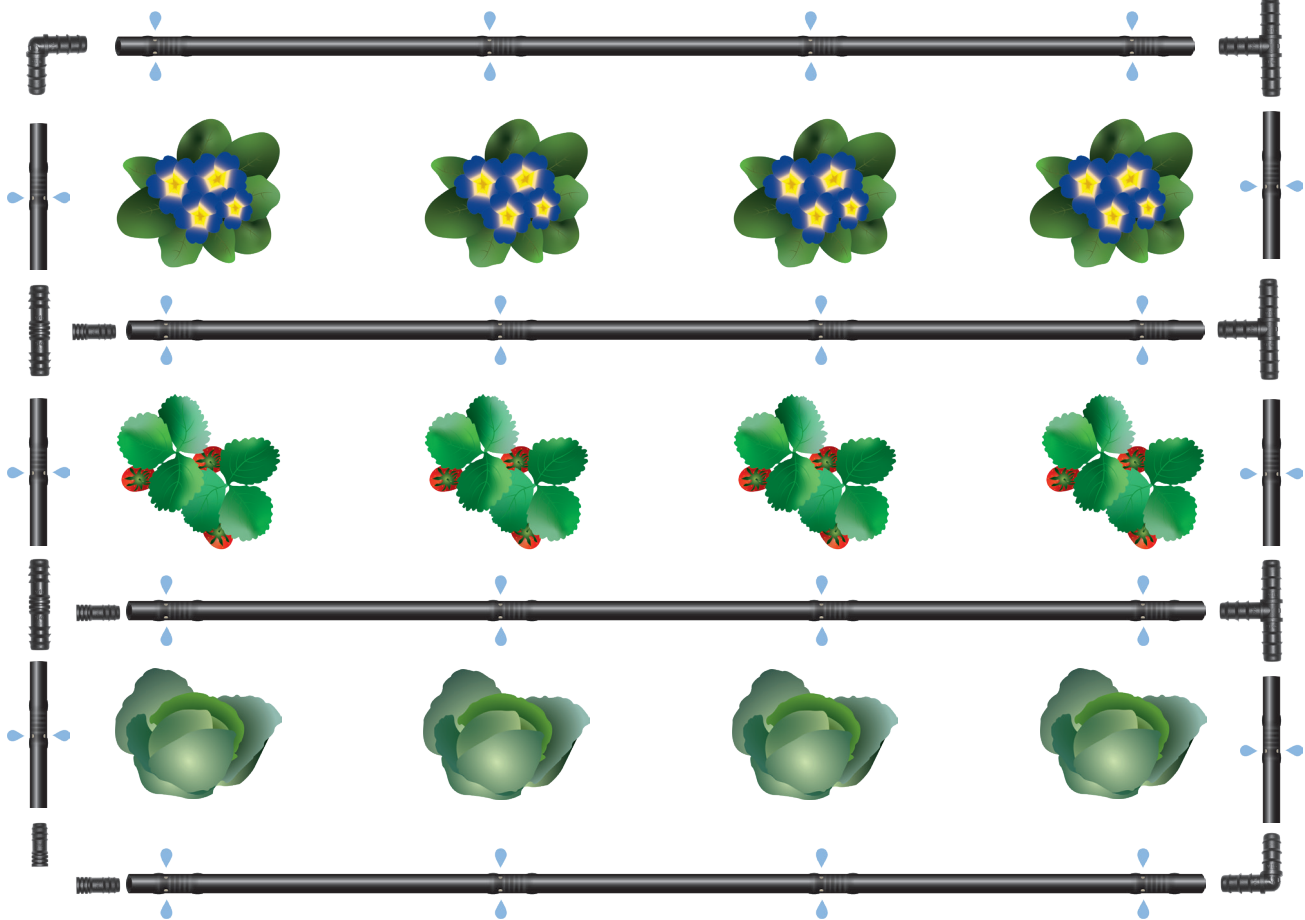

Hole plug with 16 mm hose barb 5 pieces

Extendable with additional modules like e.g. a solar powered computer for automatic irrigation

Schematic representation of the connector system

# aquadrip® Multi-Drip Irrigation

All in one set for the start of effective irrigation

For greenhouses, raised beds, hedges, vegetable beds and garden irrigation
